

# Nyabihu district brief

Generated 2026-09-25

Model-based estimates. Not official NISR statistics.

## Beans (B 2025)

|                  |                          |
|------------------|--------------------------|
| Actual yield     | 1012 kg/ha               |
| Attainable yield | 1639 kg/ha               |
| Yield gap        | 38 percent of attainable |
| Reliability      | ok                       |

Associated with higher or lower yield (model-based, not causal): soil nitrogen (positive), soil ph (positive), rainfall mm (negative)

## Irish Potato (B 2025)

|                  |                          |
|------------------|--------------------------|
| Actual yield     | 7745 kg/ha               |
| Attainable yield | 14566 kg/ha              |
| Yield gap        | 47 percent of attainable |
| Reliability      | ok                       |

Associated with higher or lower yield (model-based, not causal): soil nitrogen (positive), rainfall mm (positive), soil ph (positive)

## Maize (B 2025)

|                  |                          |
|------------------|--------------------------|
| Actual yield     | 1031 kg/ha               |
| Attainable yield | 2187 kg/ha               |
| Yield gap        | 53 percent of attainable |
| Reliability      | ok                       |

Associated with higher or lower yield (model-based, not causal): inorganic fert (negative), soil ph (negative), pesticide (negative)

## Sorghum (A 2025)

*Too few surveyed plots this season to report reliably.*

AgriTwin Rwanda. NISR 2026 Big Data Hackathon. Yield and yield-gap figures are survey-weighted model-based estimates, not official NISR statistics. Driver associations are not causal.
